Sharp's Comment on Media Reports Including Sharp's Financial Results

On September 25, 2015, there were media reports speculating that Sharp is expecting operating loss in the accumulated second fiscal quarter of the year ending March 2016. However, these are not based on Sharp's announcement.

The financial results of the accumulated second fiscal quarter ending September 30, 2015 are expected to fall short of the previously announced forecast (of operating profit of 10 billion yen) under the severe environment such as stagnant market trends of the small and medium size LCD panels. However, we are not at the stage of calculating financial results in a rational manner before closing the second fiscal quarter ending September 30. At this time, we have no plans of revising our consolidated financial results forecast of the year ending March 2016.

We will timely disclose once revisions of financial results forecast are necessary.

The financial results of the second fiscal quarter of the year ending March 2016 are scheduled to be announced in the end of October 2015.
