

FFD (Free Form Display)

Thanks to FFD technology, the degree of freedom available for the automotive display design has improved significantly.

POINT
1

Allows creating flexible configurations to fit automotive interiors. Paves the way for new cockpit designs.

POINT
2

Achieves displaying a large amount of information by the large screen and high-definition display.

Flexible OLED (in-vehicle)

Flexible OLED will revolutionize the designs of automotive interiors.

POINT

1

Flexibility enables sharp bending.

POINT

2

Three-dimensional configuration allows installation of intuitive UI.

POINT

3

High reliability ensures automotive quality.

SHARP

Be Original.
