For Productivity That Begins with
Touchscreen Ease, Scanning Efficiency,
and Access on the Move
Intuitive, Efficient, and Convenient to the Core

Enhanced operability, fast 51/41-ppm output, breathtaking image quality, and convenient mobile access make the MX-5141N/4141N an ultra-productive document hub. For quick and easy document handling, the MX-5141N/4141N’s 10.1-inch color LCD touchscreen offers real-time image previews and intuitive editing via simple finger gestures. The MX-5141N/4141N also boasts a high-speed Duplex Single Pass Feeder and supports performance-boosting options for document finishing, Web browsing, and Sharp OSA (Open Systems Architecture). Other advantages include eco-friendly performance and multi-layered security functions—such as built-in data encryption and erasure by overwriting—that bring total peace of mind.
Floristry is the general term used to describe production, commerce and trade in flowers. It encompasses flower care and handling, floral design or flower arranging, merchandising, and display and flower delivery.

Wholesale florists sell bulk flowers and related supplies to professionals in the trade. Retail florists offer fresh flowers and related products and services to consumers. Floristry as a term can refer to the cultivation of flowers as well as their arrangement, and to the business of selling them.

---

**Breathtaking Image Quality**

Sharp’s second-generation Mycrostoner-HG (High Grade) and an improved imaging system combine to allow the full spectrum of colour reproduction in crisp, sharp detail. The MX-5141N/4141N delivers fast, high-resolution copying and printing to render text documents, photographs, illustrations, maps, and graphs—including fine lines and small print—with breathtaking precision and clarity. And because the MX-5141N/4141N is so easy to operate, superb-quality images are always just a touch away.

---

**Enhanced Intuitive Operation**

Simple hand gestures and a 10.1-inch colour LCD touchscreen let even first-time users navigate the MX-5141N/4141N with ease. Thanks to multi-touch operation, two-finger pinch and spread gestures facilitate Web browsing and make it easy to shrink and enlarge images in Advanced Preview. Equally easy one-touch commands, such as flick, drag, and tap, provide quick onscreen access to MFP functions and ultra-smooth intuitive operation.

---

**Sharpdesk Mobile**

As document demands increasingly move from out behind the desk to wherever business takes you, Sharpdesk Mobile*—an easy-access mobile print/scan application that connects Sharp MFPs to popular mobile devices via a wireless LAN connection—can help you keep pace. Documents scanned on a Sharp MFP can be sent to a mobile device to preview and save. And documents saved on a mobile device can be printed out on the MFP, sent as e-mail attachments, or used in other applications. By combining the efficiency of Sharp MFPs and the convenience of mobile devices, Sharpdesk Mobile is adapting document usage to today’s changing work styles.

* Availability varies by country/region. For details, see the Sharpdesk Mobile support Web site: http://sharp-world.com/products/copier/docu_solutions/mobile/sharpdesk_mobile/
Super-Efficient Colour and B/W Output
The MX-5141N/4141N delivers a fast output of 51/41 cpm/ppm* in B/W and in full colour. And the first copy comes out in just 4.1/4.7 seconds in B/W and 5.7/6.7 seconds in full colour to save valuable time when performing multiple short-run jobs.

* A4 (8.5 * x 11”), long-edge feeding

Speedy Document Feeding
The MX-5141N/4141N comes standard with a highly efficient 150-sheet DSPF (duplex single pass feeder), which scans both pages of two-sided documents up to A3 (11" * x 17") in size in one pass. Doing away with the reversing circuit minimises paper misfeeds and vastly improves reliability. With a scanning speed of up to 85 opm* (one-sided) or 170 opm* (two-sided), the MX-5141N/4141N finishes even large projects quickly.

* Originals per minute; when feeding A4 (8.5 * x 11”) sheets

Built-In Stackless Duplex Module
The MX-5141N/4141N can make two-sided copies and printouts using its built-in stackless duplex module, effectively reducing paper costs as well as saving filing space.

Automated Finishing
The MX-5141N/4141N offers plenty of finishing options to suit a variety of workplaces and applications. For basic sorting/stapling of documents of up to 50 sheets, two types of handy finishers are available: the space-efficient Finisher can be added on without taking up much room, while the large-capacity Finisher has output trays that can hold up to 4,000 sheets. Saddle Stitch Finishers also come in two types: one has an output tray capacity of 1,000 sheets, while the other boasts a capacity of 4,000 sheets and can handle A3W (12” * x 18") paper. In addition to basic sorting/stapling, both types of Saddle Stitch Finishers can fold/staple documents of up to 15 sheets to make completed booklets. Punch Modules, which punch holes in documents for easy filing, are available for each finisher.

Extra Paper Capacity
For high-volume work, the MX-5141N/4141N can accommodate an optional stand with 2,000-sheet paper drawer for a total capacity of 6,600 sheets. When a tray runs out of paper, the Auto Tray Switching function automatically switches to another paper tray filled with the same size paper, allowing you to do extra-large volume jobs without worry.

A Range of Copy/Print Applications

Multi Shot and Booklet Making
Thanks to Multi Shot, two to eight pages of a multi-page document can be copied and up to 16 pages can be printed onto a single sheet, reducing paper use. And with the optional Saddle Stitch Finisher, multiple sheets can be automatically centre-stapled together to make booklets.

Book Divide
When copying or scanning a booklet or book, the Book Divide function separates the right and left (or the top and bottom) of a two-page spread and outputs each page in the original page order.

Image Positioning
With this function, a scanned image, such as a photo or an illustration, can be copied onto another document in a position specified by the user. The output can be confirmed beforehand using the Advanced Preview function on the LCD.

Long-Paper (Banner) Printing*
The optional Long Paper Feeding Tray accommodates extra-long paper up to 1,200 mm—expanding the range of print products to include panoramic pictures, large display-window ads, banner signs, and more.

* Contact a Sharp customer representative for details on using this function.

Supports Most Office Environments
The MX-5141N/4141N works with the latest and most commonly used versions of Windows®, Windows Server®, and Mac operating systems and network protocols—including IPv6—even in mixed OS environments. You get fast, powerful network printing via the 1000Base-T Gigabit Ethernet standard.
**SUPERB IMAGE QUALITY**

**Improved Imaging System**
Sharp thoroughly revamped its imaging process for the MX-5141N/4141N; now a high-performance processor, a new developer, and the second-generation Mycrostoner-HG (High Grade) combine to provide breathtaking image quality. The new toner expands the colour reproducibility range for a more natural rendering of clear blue skies, emerald green oceans, and other colour images. And the smaller particle size of the toner and the developer allows for reduced graininess and clear reproduction of fine lines, fine text, and halftone colours.

**High-Resolution Output**
The MX-5141N/4141N delivers 600-dpi copying and razor-sharp 1,200-dpi printing—without sacrificing output speed. Digital smoothing technology enhances the print and copy resolution to the equivalent of 9,600 x 600 dpi for incredibly smooth reproduction of fine lines. Fine-grained photographs, detailed illustrations and graphs, and small text come out crisp and clear.

**Easy, High-Quality Copying**
Built to deliver automated, high-quality copying, the MX-5141N/4141N can reproduce maps with crisp, clear text and can remove unnecessary background colour from newspaper and magazine copies. Here's how it works: Auto Colour Mode analyses the contents of each page to distinguish between different components, such as photos and text, and then selects the appropriate copy mode for that page. Auto Colour Selection automatically determines whether a page is colour or BW and then copies that page accordingly. And Auto Exposure automatically removes unnecessary background colour for clearer output.

**Adobe® PostScript® 3™**
The MX-5141N/4141N supports genuine Adobe PostScript 3 for better graphics handling.

**VERSATILE OPERATION**

**Direct Printing**
The MX-5141N/4141N can print PDF, TIFF, JPEG, XPS*, and other files without using the printer driver. And there's a USB port beneath its control panel, which comes in handy when printing data directly from USB memory devices—an indispensable function for users who are in a hurry or who want quick machine access without a PC.

*1: Direct printing may not support all PDF, TIFF, JPEG, and XPS formats.
*2: Direct XPS printing requires optional MX-PUX1.

**High-Speed Copying**

**Output Speed**

**Other Key Features**

**Heavy-Paper Handling**
The MX-5141N/4141N can handle heavy paper up to 300 g/m², further expanding the range of printing applications.

**Repeat Layout**
Upgraded from the conventional Photo Repeat function, this function can repeat an entire page layout as a single image onto a single sheet.

**Auto Zoom for Irregular-Size Originals**
With Auto Zoom, after the user specifies the required finished size of a copy, the MX-5141N/4141N will automatically calculate the appropriate ratio by which to reduce or enlarge an irregular-size original.

**Layout Print**
This function repeats an entire page layout as a single image. The user can specify whether or not to repeat the first page (cover page) of the document.

**Simultaneous Job Processing**
The MX-5141N/4141N makes it easy to simultaneously carry out multiple jobs. Scanned documents can be copied and e-mailed at the same time. And documents can be simultaneously printed and faxed for ultra-convenient multitasking.

**Other Key Features**
- **Tab Copy / Tab Print** can copy or print directly onto tabs on document separators and insert them into assigned positions.
- **Multi-Page Enlargement** divides an image onto separate sheets for copying/printing posters.
- **Carbon Copy Print** mode automatically outputs multiple printouts of the same data on plain and/or coloured paper; convenient for invoices and purchase orders.
- **Form Overlay** can store office document formatting such as letterheads and overlay contents in colour, eliminating the need for pre-printed paper.
- **Barcode font compatibility (requires optional MX-PF10)**
- **Card Shot** enables easy copying of both sides of a card (credit cards, ID cards, etc.) onto a single page.
- **Colour Stamp** labels your copies with page numbers, the date or text such as “Urgent” in up to four different colours.
- **Book Copy** is convenient for compiling copies of a book or bound originals into pamphlet format.
A3 Colour Network Scanning

The MX-5141N/4141N works as a full-colour network scanner and supports as standard TIFF, PDF, PDF/A, encrypted PDF, compact PDF, JPEG, and XPS file formats. Scanned documents can be converted into compact PDF files to enable fast, high-volume transmission and save storage space. Enhanced scan performance improves the legibility of extremely fine text and allows vivid colour reproduction in scanned documents. Auto Colour Selection chooses the right mode for scanning originals containing both colour and B/W pages (see page 4). And five levels of sharpness and contrast control enable finely tuned adjustments for optimal image quality.

Multiple Distribution of Scanned Files

With just a few taps on the LCD touchscreen, you can choose different ways to distribute your scanned documents. Scan to E-mail sends documents as an e-mail attachment. Scan to FTP Server scans documents directly to an FTP server for storage. Scan to Desktop sends scanned documents directly to your PC desktop. Scan to Network Folder (SMB) sends files to a shared folder on a networked Windows-based PC. Scan to External Memory Device scans documents directly to USB memory devices. And Scan to Fax enables conventional faxing or Internet faxing.

Home Directory

The Home Directory function with user authentication allows users to designate a network folder as their own default scan destination, enabling easy data transfer. In addition to simplifying the scanning process, this handy function lets users scan and send large files that exceed the capacity of mail servers. It's so simple: after a user has logged on via user authentication and gone to the Image Send screen, the Home Directory function automatically selects the scan-destination folder.

One Scan/Multi Format

This function allows you to specify image resolution or colour for each mode of broadcasting employed. For example, when sending the same image data to both a fax and an e-mail destination, you can send a B/W version via fax and a full-colour version via e-mail.

LDAP Support

Built-in LDAP (lightweight directory access protocol) support eliminates the need to enter or register full addresses. When you enter the first few letters of the recipient’s name, the MX-5141N/4141N displays a list of possible matches from your company’s LDAP server. Selected addresses can be stored to the MX-5141N/4141N’s address book.

Drop Out Colour

This function removes chromatic colour from a scanned image, reducing the data size for compact storage and enhancing the legibility of B/W text to improve the text recognition rate before OCR.

Black Letter Emphasis

When text-heavy documents are scanned, this function improves the legibility of B/W text while keeping the file size down. Text is scanned at high resolution while the rest of the document, including photos and illustrations, is scanned at a lower resolution.

Improved Address Book

With the MX-5141N/4141Ns improved address book format, up to seven destinations, including e-mail addresses, fax numbers, and FTP addresses, can be displayed under each registered entry. For enhanced security, when registering an entry, you can select whether the information will be open to all MFP users or limited to only designated users or groups. And since only the viewable addresses for each logged-in user are displayed, the list of addresses is narrowed down, making address searches easier.

Note: Contact a Sharp customer representative for details on activating this function.

PC-Fax/PC-Internet Fax

Directly send a document created on your PC to a recipient’s fax machine via a phone line or the Internet without printing to paper. Save time and paper costs while retaining original document quality.

Note: PC-Fax requires optional MX-FX11. PC-Fax requires MX-FX11.

Internet Fax

Economically send and receive faxes to and from other T-37-compliant Internet fax machines via the Internet. Thanks to Direct SMTP support, outgoing Internet faxes do not go through your mail server, making transmission faster and cheaper.

Note: Requires optional MX-FWX1.

Paperless Faxing with Inbound Routing

Paperless faxing with inbound routing lets you check incoming faxes via e-mail before printing them out. It can also forward incoming faxes to destinations—another fax/Internet fax machine, an FTP server, a network folder (SMB), or a PC desktop—specified for each sender. When fax data is transferred by file, the Inbound Routing function automatically attaches the fax sender’s name (as registered in the MFP’s address book) to the file, so recipients will know who sent the fax.

Note: PC-Internet Fax requires optional MX-FWX1; PC-Fax requires MX-FX11.

Fax Data Storage on MFP Hard Disk

The MX-5141N/4141N automatically stores data from incoming and Internet faxes on its hard disk for easy confirmation and printing from a PC.

Note: PC-Internet Fax requires optional MX-FWX1; PC-Fax requires MX-FX11.
Document Management on the Hard Disk

You can save processed job data in designated folders on the MFP's hard disk, making it easy to instantly recall saved documents or jobs for printing and sending at a later time. This contributes greatly to efficient sharing and distribution of information in your business operations.

Quick Filing

Up to 10,000 pages or 1,000 files* that have been copied, printed, scanned, or faxed can be stored by job on the hard disk in a Quick File Folder. You can easily reuse saved data without having to reload or rescan the original.

Advanced Filing Function

Up to 20,000 pages or 3,000 files* that have been copied, printed, scanned, or faxed can be stored by job on the hard disk in up to 1,000 folders with customised names and locations. Enhanced security features require users to enter a 5- to 8-digit password to access secure folders, protecting your sensitive data. Storage options include Main Folder for workgroup sharing and Custom Folder for enhanced-security archiving.

Easy Access to Stored Files

Documents stored on the hard disk can be quickly and easily searched and accessed from the control panel's LCD via thumbnail displays and file previews or through a Web browser.

File Combining

For more effective data utilisation, two files saved on the MFP's hard disk can be easily combined into one file.

PDFs for PC Browsing

Processed job data can be saved as PDF files for browsing and downloading on a PC.

Easy Sharing of Application Files

To facilitate file sharing across the office network, the MX-5141N/4141N provides 120GB of hard disk storage space for folders. Each folder can hold up to 500 files created with applications such as Word and Excel® and saved in their original format.

Note: It is advisable to back up data saved to the MFP's hard disk through use of the optional Mirroring Kit.

Mirroring Kit

To protect the enhanced data handling capability of the MFP's hard disk, which provides improved Document Filing functions and easy sharing of application files, the optional Mirroring Kit offers hard disk backup and peace of mind.

Sharpdesk for Total Document Management

Sharpdesk is an original Sharp application that provides integrated desktop management of documents in over 200 file formats, including scanned paper-based documents and those created with popular applications such as Word. With Sharpdesk, documents can be organised, edited, searched, and distributed with simple drag-and-drop operation. Features include thumbnail viewing, annotation tools for paper-free proofreading, optical character recognition, the ability to combine different types of files into a single document, and more.

* Image Compression Tool for converting images into compact PDF files

Sharp OSA Network Scanner Tool

This client-based scan-to-desktop scanner option is the ideal document management system for small workgroups or offices that don’t have servers. Sharp OSA Network Scanner Tool provides centralised scan/print user profiles to give everyone in the office easy one-touch scanning to their PC from any networked MFP—without complicated settings. Scanned documents can be quickly and easily printed, filed, previewed, shared, and stored to save time and improve document workflow. And Sharp OSA Network Scanner Tool automatically names PDF files based on scanned-document titles and can convert scanned documents into text with the OCR engine to create searchable PDF files.

Note: Requires optional MX-AMX2.
Data Encryption and Overwriting
Digital copier/printers and MFPs retain large amounts of data generated from copy/print/scan/fax jobs in internal storage. To safeguard confidential data from unauthorised access, standard-equipped security features on the MX-5141N/4141N automatically encrypt job data prior to saving it to internal storage. Once a job is finished, that encrypted data is erased via up to seven automatic overwrites. Protection of administrator/file/folder passwords brings further peace of mind. Note: Contact a Sharp customer representative for details on activating these security functions.

User Authentication
The MX-5141N/4141N prevents unauthorised use by requiring passwords for machine access. This safeguarded solution can register up to 1,000 users in three access levels as Administrator, User, or Guest and can designate to which function user authentication applies. The MX-5141N/4141N can, for example, be set to allow B/W copying by all users while restricting colour copying to designated users. And the MX-5141N/4141N works with an external Active Directory server to extend user authentication to multiple MFPs and a greater number of users.

Encrypted PDF with Password Protection
To prevent unauthorised viewing of confidential data, the MX-5141N/4141N enables scanned PDF data to be password protected and encrypted for transmission over the network. After transmission, viewers can gain access to the encrypted PDF only after re-entering the password.

SSL and IPsec Data Encryption
To ensure an extremely high level of network security, the MX-5141N/4141N employs SSL (secure sockets layer) and IPsec (IP security) data encryption technologies. SSL encryption prevents data leakage through the network when printing via IPP, browsing secure Web pages (HTTPS), or communicating via e-mail (SMTP and POP3) or FTP (FTPS). IPsec, an obligatory part of the IPv6 Internet protocol, encrypts and authenticates traffic between specified parties.

Scan to Me Function
Scan to Me lets a logged-in authorised user send scanned data to his/her own e-mail address simply by pressing the start button. This eliminates the need to manually enter or select the address, thereby preventing documents from being sent to the wrong address.

Secure Network Access
The IP/MAC address filtering function provides highly secure operation by restricting access to the MFPs on your office network. Only PCs that have either their IP address or MAC (media access control) address registered are allowed to use the MFPs. Attempted access from an unknown IP or MAC address will be denied, preventing unauthorised use. The MX-5141N/4141N also supports the IEEE 802.1X standard for port-based network access control, which blocks all access from unauthorised devices.

Tracking Information Print
This function prints the MFP user’s name, the date, the MFP’s serial number, job ID, and other specifics on printouts, making it possible to track documents and prevent data theft.

Hidden Pattern Copy/Print
With this function, a watermark, such as “Confidential” or “Not for Copy,” can be embedded onto a document. If that document is copied, the watermark will appear, alerting the user not to distribute it.

Document Control Function (option)
Document Control prevents unauthorised copying, scanning, faxing, and filing of confidential documents by embedding copy prevention data onto a document. When that data is detected, any unauthorised attempts to copy will be cancelled or will result in only blank-page output.

Data Initialization
The MX-5141N/4141N’s initialization function allows confidential information to be erased. Initialising an MFP when it’s time to replace it prevents important resources, such as customer information and intellectual property, from leaking out and provides considerable peace of mind.
Web-Based System Settings
Administrators can manage every important setting—including user access and security as well as other controls and configurations—through a standard Web browser right from their desktops.

Remote Diagnosis
The MX-5141N/4141N can be monitored remotely through a Web browser, letting administrators handle tasks before they become problems. And when action or maintenance is required, the E-Mail Status and Alert function notifies administrators via timely e-mail alerts.

Network Utility Software
Sharp Remote Device Manager* (SRDM) gives administrators centralised control of their networked MFPs through a standard Web browser, making device cloning and other operations easier and more accessible.
* Contact a Sharp customer representative for availability and other details.

Remote Operation
The Remote Operation function lets you display the MFP’s main control panel on your PC screen, allowing you to operate every major function directly from your desktop.* This function also enables the administrator to guide an MFP user through necessary procedures and allows remote MFP operation from a wheelchair.
* Requires VNC application.

EASE OF USE

10.1-Inch Colour LCD Touchscreen
MFP operation has never been so intuitive, so easy. The MX-5141N/4141N’s control panel features a wide, clear, WS-VGA-resolution LCD touchscreen. Simple gestures—flick, drag, tap, and more—performed on the screen bring easy control of every document, function, and setting. And dual-touch pinch and spread gestures enable smooth Web browsing and effortless shrinking/enlarging of Advanced Preview images. For strain-free viewing, the MX-5141N/4141N’s user interface employs a bold scalable font in sizes that vary in line with the content on display.

Mode Tabs
Mode tabs at the top of the screen make it easy to change job modes (copy, fax, document filing, Sharp OSA, etc.).

Advanced Preview
The Advanced Preview function saves you time and effort by displaying scanned images on the LCD for confirmation and editing. Page layout and document finishes such as stapling can be checked before the documents are printed out. Previewed pages can be easily rotated, put in a different order, and deleted via tap-and-drag editing right on the LCD. You can even erase specific parts of a previewed page and insert blank pages.

Customisable Screen
The Home screen can be customised for individual users by programming their most frequently used functions and settings, creating shortcut keys for quick and easy access, and using logos, icons, background images, and other items prepared by the user. The Enlarge Display mode brings added readability.

Action Panel
The Action Panel appears on the right side of the touchscreen to guide you through operational procedures. The MFP intuits what actions to take next and the Action Panel displays shortcut keys and messages pertaining to those actions.

Other User-Friendly Features

Universal Design
- The control panel can be tilted to five different angles* for easy viewing, even from a wheelchair.
  * Number of tiltable angles depends on type of optional finisher installed.
- Easy-grip handles allow the paper drawers to be grasped from the top as well as the bottom for easy opening and closing.

Retractable Keyboard (option)
A full-size retractable QWERTY keyboard slides out from beneath the control panel to make text input fast and easy.
Outstanding Energy Efficiency
To reduce power consumption, Sharp has applied its advanced technologies across all areas of this MFP, including the hardware, software, electrical system, and supplies. As a result, the MX-5141N/4141N boasts one of the lowest power consumption rates in its class.

- Sharp’s belt fusing system shortens the MX-5141N/4141N’s warm-up time to 30/28 seconds, contributing to reduced overall energy consumption.

- Based on prior usage patterns, the MX-5141N/4141N automatically determines the optimal length of time to let elapse before going into auto power shut-off mode, helping reduce overall power consumption. Shortly before auto power shut-off mode begins, a message appears on the LCD indicating that the MFP will soon shut down and giving users the option to continue operation.

- Power ON/OFF Schedule function automatically turns the MX-5141N/4141N on or off according to time schedules set by the administrator.

Before a print,copy command is executed from the control panel, the Eco Recommendation function offers suggestions on environmentally friendly settings, helping users achieve even greater eco-friendly operation.

- * Guaranteed punchable weight is 55 to 128 g/m².

- Second-generation Mycrostoner-HG has a lower melting point than conventional toner, allowing fusing to be carried out with less energy. It also offers a significantly lower consumption rate than conventional toner.

- For further energy savings, energy-efficient LED lamps are employed in the scan unit in place of conventional xenon lamps. A new ASIC (application-specific integrated circuit) also helps the MX-5141N/4141N deliver excellent performance and energy efficiency.

EXPANDABILITY

Sharp OSA* (Open Systems Architecture)
Innovative Sharp OSA technology allows you to interact with critical business and network applications right from the LCD control panel, offering a new realm of control and convenience. And since Sharp OSA utilises industry-standard network protocols, the MX-5141N/4141N can easily integrate with document management systems, enterprise resource planning software, workflow applications, and more. The latest version of Sharp OSA can reach beyond the firewall, enabling extensive system construction and services over the Internet. Sharp OSA brings benefits such as reducing the costs associated with system implementation and management, as well as enabling data sharing across company branch offices or subsidiaries—effectively enhancing total business efficiency.

* Requires optional MX-AMX2 and/or MX-AMX3.

Direct Internet Access
The optional Web Browsing Expansion Kit gives you direct access to the Internet for easy browsing of Web sites on the colour touchscreen. With such quick access to information, brochures and user manuals in PDF format as well as maps and coupons can be printed out on the spot.

Sharpdesk Mobile*
Sharpdesk Mobile is a mobile print/scan application that combines the convenience of mobile devices and the efficiency of Sharp MFPs to make conducting business on the go easier than ever. Documents scanned on a Sharp MFP can be sent to a mobile device to preview and save. Documents saved on a mobile device can be printed out on the MFP, sent as e-mail attachments, or used in other applications.

* Availability varies by country/region. For details, see the Sharpdesk Mobile support Web site: http://sharp-world.com/products/copier/docu_solutions/mobile/sharpdesk_mobile/

Max. paper capacity A3 to ASR (11" x 17" to 8 1/2" x 11"")
Max. stapling capacity 50 sheets (A4 or smaller), 30 sheets (A4R, B4 or larger)
Staple position 3 locations (front, rear or both)

Paper size A3W to ASR (12" x 18" to 5 1/2" x 8 1/2"")
Max. paper capacity A3 to ASR (11" x 17" to 8 1/2" x 11"")
Max. stapling capacity 50 sheets (A4 or smaller), 30 sheets (A4R, B4 or larger)
Staple position 3 locations (front, rear or both)
### SPECIFICATIONS (tentative)

#### General

<table>

#### Network Printer

| Resolution             | 1,200 x 1,200 dpi; 600 x 600 dpi; 9,600 (equivalent) x 600 dpi |
| Interface              | USB 2.0, 10Base-T/100Base-T/1000Base-T |
| Network protocols      | TCPIP (IPv4, IPv6), IPX/SPX (NetWare), EtherTalk (AppleTalk) |
| Printing protocols     | LPR, Raw TCP (port 9100), POP3 (e-mail printing), HTTP, Novell Printserver application with NDS and Bindery, FTP for downloading print files, EtherTalk printing, IPP |
| PDL (emulation)        | Standard: PCL 6 emulation, Adobe® PostScript® 3™ Option: XPS |
| Available fonts        | 80 fonts for PCL, 136 fonts for Adobe® PostScript® 3™ |

#### B/W Facsimile (optional MX-FX11 required)

| Compression method     | MH/MR/MMR/JBIG |
| Communication protocol | Super G3/G3 |
| Transmission time       | Less than 3 seconds*5 |
| Modem speed            | 33,600 bps to 2,400 bps with automatic fallback |
| Transmission resolution | From Standard (203.2 x 97.8 dpi) to Ultra Fine (406.4 x 391 dpi) |
| Recording width         | A3 to A5 (11” x 17” to 5 ½” x 8 ½”) |
| Memory                 | 1GB (built-in) |
| Grey scale levels       | Equivalent to 256 levels |

---

*1: At rated voltage, 23°C (73.4°F). May vary depending on operating conditions and environment.

*2: HDD capacity depends on procurement and sourcing status.

*3: Long-edge feeding of A4 (8½” x 11”) sheets from 1st paper tray, using document glass, without Auto Colour Selection and Auto Colour mode, MFP in fully ready condition. May vary depending on operating conditions and environment.

*4: Resolutions higher than 600 dpi are interpolated.

*5: Colour only.

*6: To view XPS files on PCs not running Windows Vista, you must have the XPS Viewer application installed.

*7: Storage capacity will vary depending on the type of document and the scan settings.

*8: Some features require options.

*9: Based on Sharp’s standard chart with approx. 700 characters (A4 or 8½” x 11” long-edge feeding) at standard resolution in Super G3 mode, 33,600 bps, JBIG compression.
