GP2Y0D413K0F is a distance measuring sensor unit, composed of an integrated combination of PSD (position sensitive detector), IRED (infrared emitting diode) and signal processing circuit. The variety of the reflectivity of the object, the environmental temperature and the operating duration are not influenced easily to the distance detection because of adopting the triangulation method. The output voltage of this sensor stays high in case an object exists in the specified distance range. So this sensor can also be used as proximity sensor.

**Features**
1. Digital output type
2. Detecting distance: Typ. 13 cm
3. Package size: 29.5×13×13.5 mm
4. Consumption current: Typ. 14 mA
5. Supply voltage: 4.5 to 5.5 V

**Agency approvals/Compliance**
1. Compliant with RoHS directive (2011/65/EU)

**Applications**
1. Touch-less switch
   (Sanitary equipment, Control of illumination, etc.)
2. Robot cleaner
3. Sensor for energy saving
   (ATM, Copier, Vending machine)
4. Amusement equipment
   (Robot, Arcade game machine)

* L : Distance to reflective object
(Note 1) Using reflective object : White paper (Made by Kodak Co., Ltd. gray cards R-27 white face, reflectance; 90%)
(Note 2) The individual product shall be adjusted to have L = 13 cm ± 1.5 cm as the distance before shipping detecting.
(Note 3) Possible distance measuring range (of the sensor optics)
(Note 4) Output voltage switch has a hysteresis width. The distance specified by L should be the distance which the output turns from L to H in case an object moves to the sensor.

Notes

- **Advice for the optics**
  - The lens of this device needs to be kept clean. There are cases that dust, water or oil and so on deteriorate the characteristics of this device. Please consider in actual application.
  - Please don’t do washing. Washing may deteriorate the characteristics of optical system and so on. Please confirm resistance to chemicals under the actual usage since this product has not been designed against washing.

- **Advice for the characteristics**
  - In case that an optical filter is set in front of the emitter and detector portion, the optical filter which has the most efficient transmittance at the emitting wavelength range of LED for this product (λ = 870 ± 70nm), shall be recommended to use. Both faces of the filter should be mirror polishing. Also, as there are cases that the characteristics may not be satisfied according to the distance between the protection cover and this product or the thickness of the protection cover, please use this product after confirming the operation sufficiently in actual application.
  - In case that there is an object near to emitter side of the sensor between sensor and a detecting object, please use this device after confirming sufficiently that the characteristics of this sensor do not change by the object.
  - When the detector is exposed to the direct light from the sun, tungsten lamp and so on, there are cases that it can not measure the distance exactly. Please consider the design that the detector is not exposed to the direct light from such light source.
  - Distance to a mirror reflector can not be sometimes measured exactly.
    - In case of changing the mounting angle of this product, it may measure the distance exactly.
    - In case that reflective object has boundary line which material or color etc. are excessively different, in order to decrease deviation of measuring distance, it shall be recommended to set the sensor that the direction of boundary line and the line between emitter center and detector center are in parallel.

  ![Diagram](image1)

  • In order to decrease deviation of measuring distance by moving direction of the reflective object, it shall be recommended to set the sensor that the moving direction of the object and the line between emitter center and detector center are vertical.

  ![Diagram](image2)

- **Advice for the power supply**
  - In order to stabilize power supply line, we recommend to insert a by-pass capacitor of 10μF or more between Vcc and GND near this product.

- **Notes on handling**
  - There are some possibilities that the internal components in the sensor may be exposed to the excessive mechanical stress. Please be careful not to cause any excessive pressure on the sensor package and also on the PCB while assembling this product.
● Presence of ODC etc.
   This product shall not contain the following materials.
   And they are not used in the production process for this product.
   Regulation substances : CFCs, Halon, Carbon tetrachloride, 1.1.1-Trichloroethane (Methylchloroform)

   Specific brominated flame retardants such as the PBB and PBDE are not used in this product at all.

   This product shall not contain the following materials banned in the RoHS Directive (2011/65/EU).
   • Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyls (PBB),
     Polybrominated diphenyl ethers (PBDE).

部位注意事项

- 电路应用示例在本出版物中提供，以代表SHARP设备的应用。SHARP设备及其设计或知识产权不保证任何电路设计或任何知识产权。SHARP不承担由于使用SHARP设备的第三方引起的问题。SHARP设备不承担任何电路设计或任何知识产权的义务。

- 联系SHARP以获取设备的最新设备规格表。SHARP保留修改规格表的权利。规格表和数据、材料、结构和其它内容描述的任何时间无通知，用于改进设计或可靠性。制造地点也受变更通知。

- 观察使用设备时的注意事项。SHARP不对设备造成的损坏负责，除非设备的条件不符合规格或规格中的绝对最高规格。观察以下条件时应使用的规格表。

(i) 设备的规格适用于一般电子设备设计（例如）。
--- 个人计算机
--- 办公自动化设备
--- 通信设备 [终端]
--- 测试和测量设备
--- 工业控制
--- 音频视频设备
--- 消费电子设备

(ii) 采取措施，例如故障安全和冗余设计，以确保可靠性时SHARP设备作为连接设备使用。

with equipment that requires higher reliability such as:
--- Transportation control and safety equipment (i.e., aircraft, trains, automobiles, etc.)
--- Traffic signals
--- Gas leakage sensor breakers
--- Alarm equipment
--- Various safety devices, etc.

(iii) SHARP devices shall not be used for or in connection with equipment that requires an extremely high level of reliability and safety such as:
--- Space applications
--- Telecommunication equipment [trunk lines]
--- Nuclear power control equipment
--- Medical and other life support equipment (e.g., scuba).

- 如SHARP设备在本出版物中列出的设备不在战略产品的范围之内，根据日本《外汇及贸易法》，必须获得批准。

- 本出版物是SHARP的专有产品，所有权利受保护。根据版权法，本出版物的任何部分均不得复制或以任何方式或任何手段，电子或机械，用于任何目的，在部分，没有SHARP的书面许可，包括任何使用本出版物的许可。如果对本出版物有任何疑问，应咨询SHARP的代表。
